DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 – 19, drawn to a detail of mobile telephone with call identification, classified in class 455, subclass 415.
 - II. Claims 20 – 30, drawn to service detail of mobile switching center, classified in class 455, subclass 560.
 - III. Claims 31 – 35, drawn to voice mailing method, classified in class 455, subclass 413.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions III, II, and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II and III have separate utility such as *a call processing service method of a mobile switching center and a voice mailing service method for mobile telephone*, respectively. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2684

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
